

700 Series Music Chair

711 & 713 Frames

All-tubular design, 1" diameter 18 gauge tubing legs and 1" diameter 16 gauge back tube (models 711-714). All frames are metallic arc welded with a series of "stitch welds" on each side of the leg support tube for added strength. Chrome plated finish using 1" self adjusting glides. Chairs are built for music applications, as the back tube is bent to a 90 degree upright position.

715 & 717 Frames

All tubular-design, 1" diameter 14 gauge tubing legs and 1" diameter 14 gauge back tube (models 715-718). All frames are metallic arc welded with a series of "stitch welds" on each side of the leg support tube for added strength. Chrome plated finishing using 1" self adjusting glides. Chairs are built for music applications, as the back tube is bent to a 90 degree upright position.

Glides

1" diameter, short ferrule, Nevermar glides, with steel ball joint swivel. Nylon, steel, and adjustable glides are available upon customers request.
